

## 4-Port USB DVI Multi-View KVMP™ Switch

### CM1164A

• ATEN CM1164A 4-Port USB DVI Multi-View KVMP™ Switch improves the operational efficiency of intensive monitoring applications. With limited screen, to allow users to manage the data more efficiently, up to 16 video sources can be selected, switched and displayed at the same time with independent keyboard, mouse control. The CM1164A provides users a real-time monitoring functionality by combining a 4-port DVI-D switch with a 2-port USB hub and providing the following display modes: Quad View, Picture in Picture (PiP), Picture by Picture (PbP), Picture on Picture (PoP), and Full Screen mode.

Featuring Boundless Switching, the CM1164A allows users to simply move the mouse cursor across windows to switch to other video sources. This makes it easier to instantly access and control the target computer.

Incorporating Daisy Chain Control (DCC) capability, users are allowed to control up to 3 additional CM1164A units via a single console. In addition, CM1164A can be cascaded up to 2 levels to reach the maximum of 16 video sources simultaneously displayed on a display.

Engineered to meet the ever-increasing demand for multi-view functionality, the CM1164A is specifically designed for where real-time monitoring is needed such as aviation industry, financial trading, and medical application.

CM1164A Rear view

# Features

- Multi-view console controls up to four video sources on one screen with display modes including Quad View, Picture in Picture (PiP), Picture by Picture (PbP), and Picture on Picture (PoP)
- System configuration via front panel, OSD, IR Remote display mode and port selection
- Supports superior video quality Up to 1920 x 1200; YCbCr 4:2:2
- Easily resize and / or reposition any PiP or PbP to suit users' viewing needs
- DCC (Daisy Chain Control) Controls up to 3 additional CM1164A units from a single console
- Cascade up to 2 levels Controls up to 16 computers (with up to 4 x 4 Multi-view mode)
- Boundless Switching simply move the mouse cursor across windows to switch to other video sources even among the daisy chained installation
- Boundless Switching Focus a window frame to indicate which computer that it currently has the focus
- Video DynaSync™ exclusive ATEN technology eliminates boot-up display problems and optimizes the resolution when switching among different sources
- HDCP 1.4 compliant
- Supports RS-232 commands
- Drop down menu edit display windows and other functions with the mouse and on-screen control panel
- Console mouse port emulation / bypass feature that supports most mouse drivers and multifunction mice
- Console keyboard emulation / bypass feature that support most multimedia keyboards
- Independent switching for USB peripheral port, audio function and KVM switch focus
- Auto Scan feature
- Power on detection
- Multilingual keyboard mapping supports English, French, Japanese, and German keyboards
- Full bass response provides a rich experience for 2.1 channel audio
- Supports keyboard combinations via emulation (for Sun / Mac)

## Highlights

Flexible Display Modes	CM1164A supports Quad View, Picture in Picture (PiP), Picture by Picture (PbP), Picture on Picture (PoP), and Full Screen mode. User can change size and location of each video source and easily click on demand to control PC.
Boundless Switching	Boundless Switching is a patented ATEN technology. By moving the mouse cursor across different windows, users are allowed to switch KVM focus among multiple sources on multiple windows. The mouse cursor can be moved to another window in any direction and instantly access the target computer.
Expandability	Supports Daisy Chain Control (DCC) for user to control up to 3 additional CM1164A units from a single console. Also, CM1164A can be cascaded up to 2 levels to control up to 16 computers.
Video DynaSync™	ATEN's exclusive Video DynaSync™ technology automatically detects the horizontal and vertical offset values of each computer's display settings and synchronizes them with the monitor users are working on, ensuring that the display resolution will always be correct when switching among different video sources.
