Part 1

How to use Time Machine to back up or restore your Mac

Step 1
Connect a backup HDD or SSD to your Mac.

Step 2
Open Time Machine and select the external disk as backup disk. Then check "Show Time Machine in menu bar".
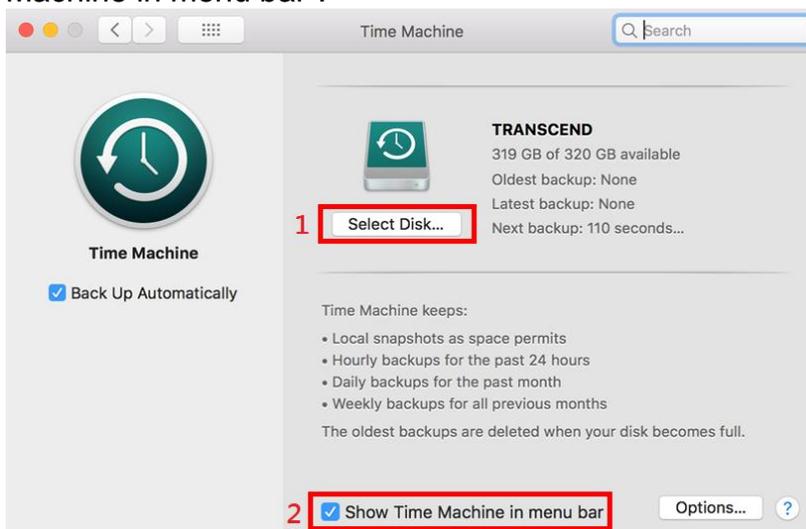

Step 3

Select "Back Up Now" from the Time Machine menu ⟲.
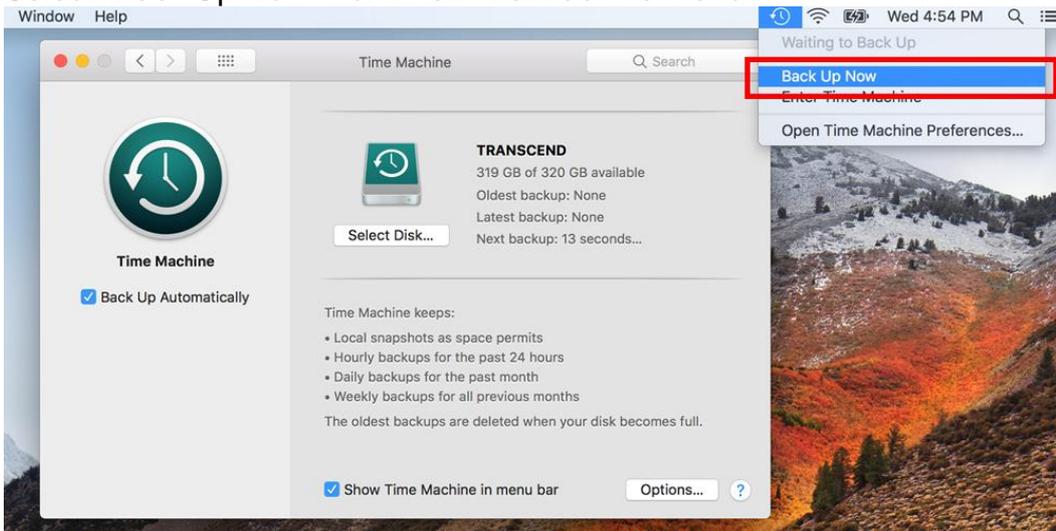

Step 4

When backup is completed, you can see the summary of the backup.
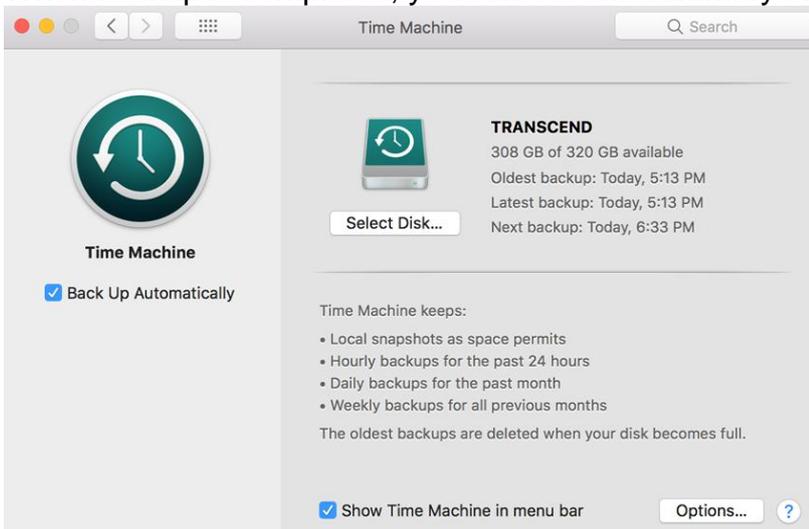

Step 5
Power off and replace your original SSD to the new JetDrive SSD.
Note: For details on how to remove the JetDrive SSD from the enclosure (if applicable),
please see Part 2.
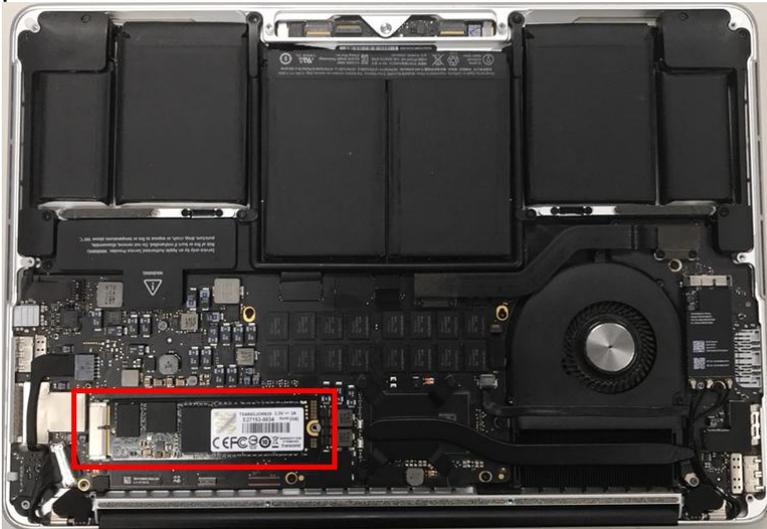

Step 6
Power on your Mac and long press the "Option" key during startup.

Step 7

Select the backup disk to restore your Mac OS.

Step 8

Select "Restore From Time Machine Backup" and click on "Continue".
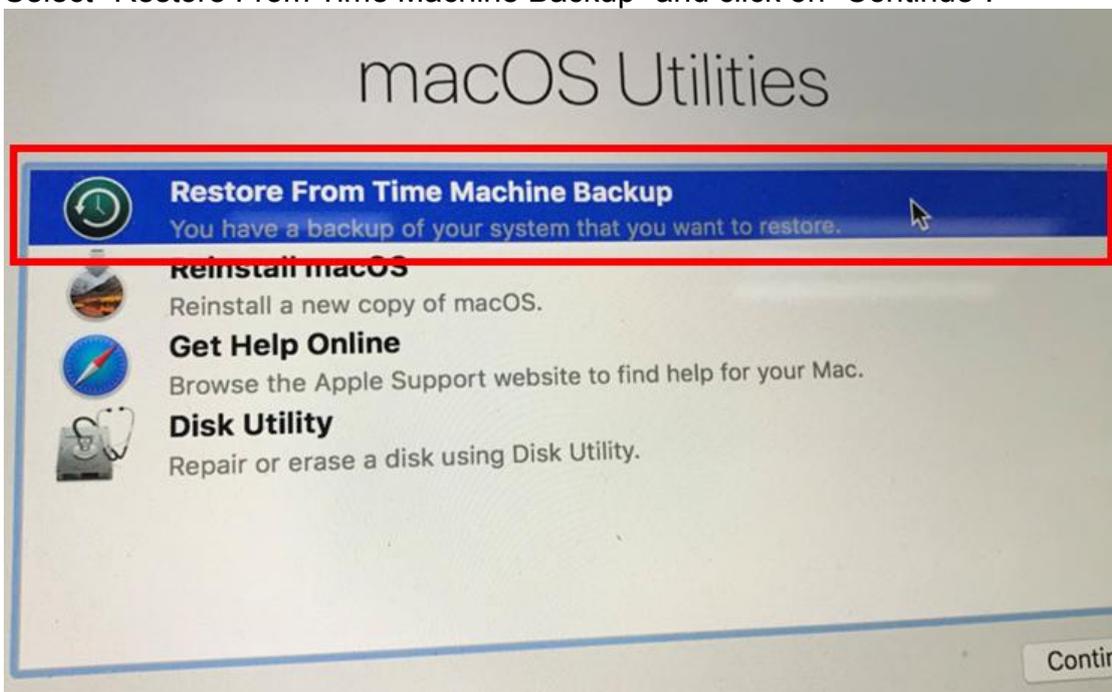

Step 9
Select the external Backup disk to restore your Mac OS (same disk as in Step 7) and click on "Continue".
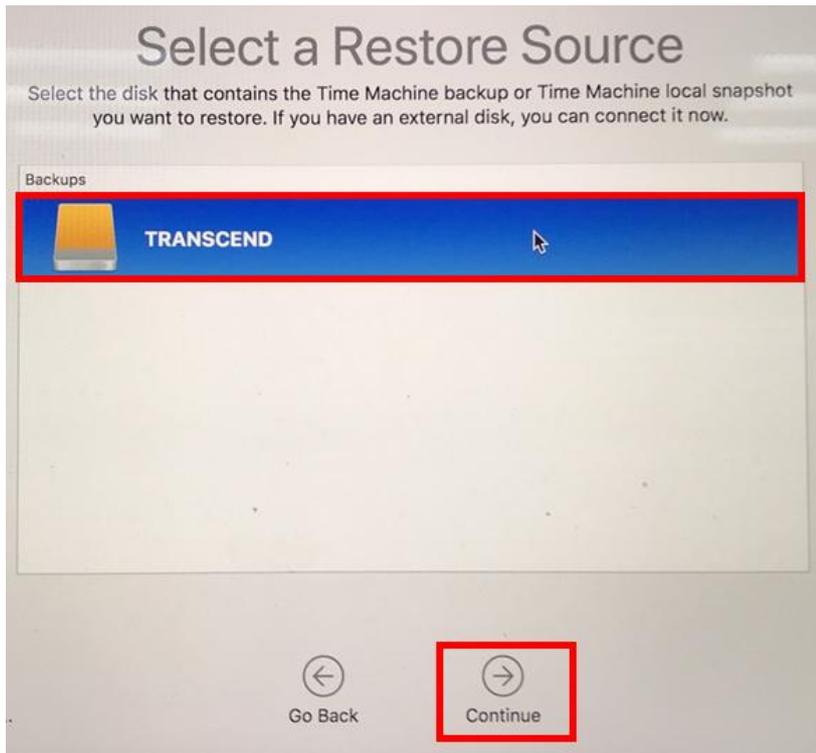

Step 10
Select a backup date and time, and click on "Continue."
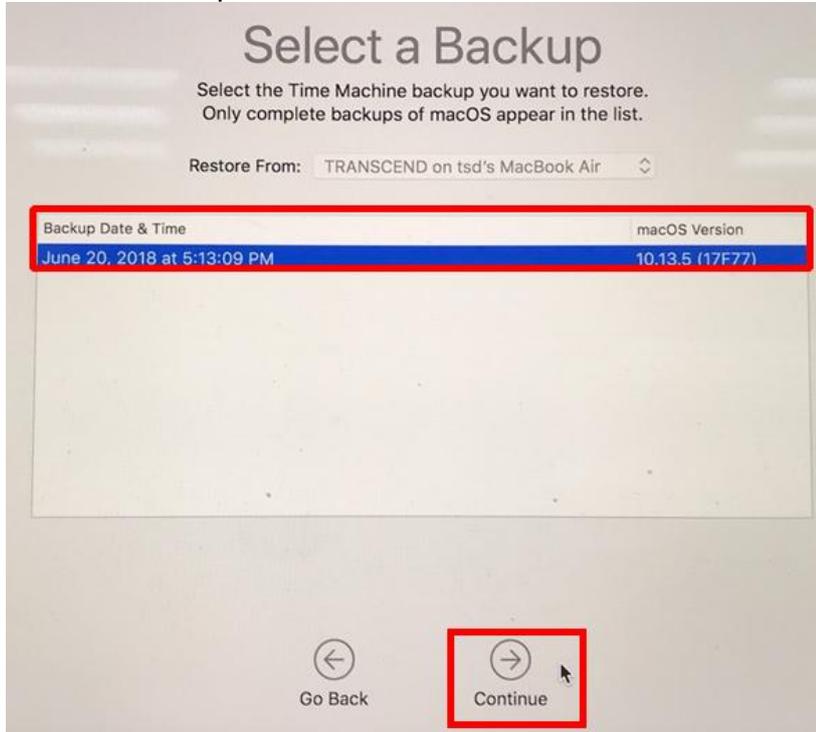

Step 11
Choose the Destination (JetDrive) disk and click on "Restore".
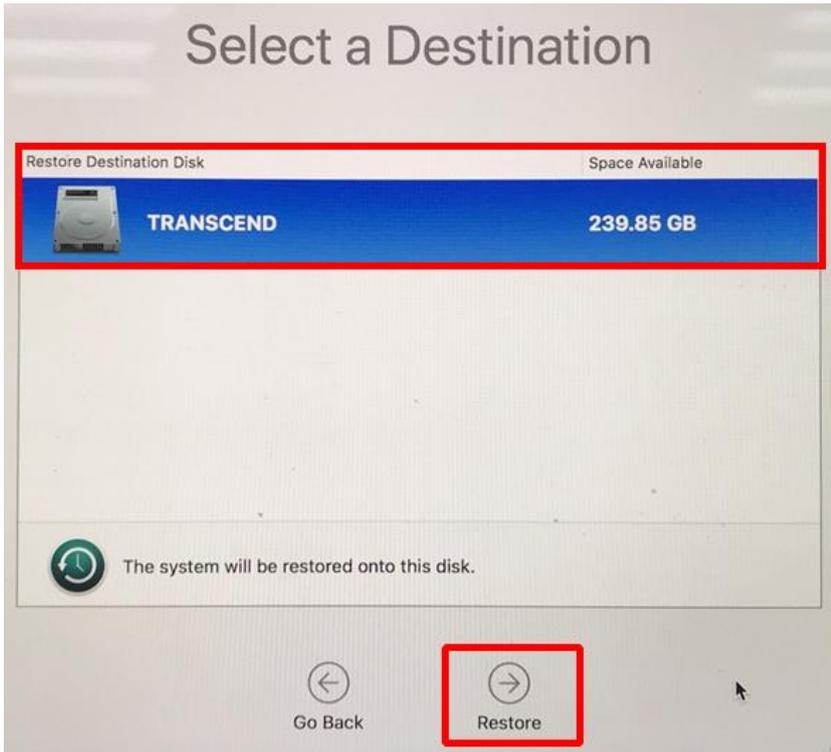

*Please refer to the Apple website for more information.

Part 2

How to install the JetDrive SSD
