

# Contour Laptop Stand

INCLUDES  
CARRYING  
BAG

## Contour Laptop Stand - lightweight and pocket sized!

The Contour Laptop Stand allows you to elevate the laptop display to eye level at an optimal distance. By using the laptop stand, the discomfort and long-term injury risks of laptop use are things of the past. By encouraging you to sit back in your chair and using a laptop stand along with an external keyboard and mouse, you are promoting a good ergonomic posture while you are computing.

### Home Office approved

When working from home or on the road you seldom have the luxury of an external screen. With the Contour Laptop Stand you can raise your screen to a better ergonomic viewing height, giving you an improved ergonomic posture. The easy setup makes it an approved tool for home workers and travellers alike.

### Lightweight and pocket sized

The durable aluminium body ensures reliability, and holds up to 17" and a 4,9 kg load, making it suitable for most laptops. It quickly collapses to fit in your pocket or computer bag. And then it keeps your computer cool. With the three pod design, you keep the fan free, and makes it easy on your computer to keep cool, even when working for several hours.
