HPE Persistent Memory

Do you need to increase the performance of your data center database and analytics applications?

With traditional storage technology not always able to keep pace with today's demanding workloads, customers are looking for solutions that allow them faster access to their data so they can make quicker business decisions and achieve business outcomes in real time. This means bottlenecks that restrict that data flow must be removed so customers can access, analyze, and act on data more quickly to gain competitive advantage, thus increasing revenue and/or lowering TCO.
