RAM No-Drill™ Seat Bases
RAM Mounting Systems

Vehicle base for the
FORD ESCAPE (2001-2012)
MAZDA TRIBUTE (2005-2010)
MERCURY MARINER (2005-2010)

INSTALLATION INSTRUCTIONS

1. Move the passenger seat back to its rearmost position and remove the front seat leg bolts. For most models, a T55 torx bit is required to remove the seat leg bolts.
2. Place the stand offs over the seat frame legs.
3. Pass the bolt with washer through the holes in the No-Drill™ base.
4. Lower the base with bolts over the stand offs, pass the bolts into the threaded hole, and begin threading the bolt by hand.
5. Next, use a 17mm socket to fully tighten the bolt and secure the base in place. For the bolt closest to the passenger side door, a wobble attachment will facilitate the tightening of this bolt.
