Kingston FURY™ Impact DDR3 opens up a world of detail that other gamers will never know: the hairs on the back of your victim's neck, for instance. It automatically recognises the platform it's plugged into and auto overclocks to the highest memory frequency published* (up to 1866MHz) with no need to adjust system BIOS settings. So you get extreme performance that supports notebooks and other small-form-factor systems using either AMD or the latest Intel CPU technologies with no hassle at all. And all you'll ever miss is lag.

Automatic overclocking

Reach faster speeds and higher capacities by just installing the memory, no adjustments in BIOS needed.

Kit capacities up to 16GB

Kits are available to max out your system's memory with up to 16GB of high-performance.

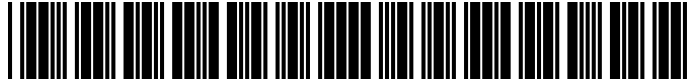

Low Voltage

FURY Impact memory boasts low voltage settings at 1.35V for cooler and quieter computing in notebooks.
