

# GDS® Desktop Dock with Power Delivery & Peripheral Port

This single GDS® Desktop Dock with Power Delivery and data sync is a low-profile docking and charging station for phones and small tablets wrapped in an IntelliSkin® protective sleeve. Take advantage of the USB Type A port on the side of the dock for peripheral add-ons to turn the desktop dock into a workstation using a keyboard, mouse or other peripheral. The desktop dock features pogo pin contacts designed to match the pogo pads on IntelliSkin®-wrapped devices supporting USB Type-C charging profiles. A USB Type-C charging cable plugs into the back of the dock with a power output of 20V @3A max. This dock will support all devices wrapped in both IntelliSkin® and IntelliSkin® Nex Gen devices.

**Compatible Devices:**  
IntelliSkin®-wrapped phones

## RAM-GDS-DOCK-D7AU
