

Soft Newborn Z-Band Wristband Solutions

Gentle enough for a newborn's delicate skin

Wristbanding newborns is a sensitive issue. While hospitals go to great lengths to properly identify newborns, clinicians are also concerned with the comfort and durability of the bands. Zebra kept these challenges in mind when creating a complete line of wristbands for newborns.

Barcoded wristbands are the foundation for positive patient identification and the prevention of serious medical errors. Zebra thermal printers produce crisp, clear print quality on all wristbands, so barcodes scan quickly and reliably. Zebra offers several soft, comfortable newborn wristbands to meet most hospital's needs.

Zebra's ZD510-HC Patient I.D. Solution

The reliable ZD510-HC direct thermal printer combined with easy-to-load cartridges of Z-Band wristbands in adult, pediatric or newborn sizes allow patient I.D. protocols to be easily implemented. Pop the wristband cartridge into the ZD510-HC printer and print durable, individual wristbands on demand. The ZD510-HC printer detects the wristband size and automatically calibrates its settings for optimal print quality.

FACT SHEET

SOFT NEWBORN Z-BAND WRISTBAND SOLUTIONS
