

# Next Gen IntelliSkin® for Samsung Galaxy Tab Active3

The Next Generation IntelliSkin® protective sleeve for the Samsung Galaxy Tab Active3 features several enhancements to the original IntelliSkin®. First, an insert molded redesign of the skin combines a hard plastic shell with soft, shock-absorbing rubber. Second, ruggedized contacts for repetitive docking in field applications remain on the exterior, but are now flat to collect less dirt and allow for easier cleaning. And third, an integrated USB Type-C connector at the bottom of the skin allows for device charging when a GDS® Dock™ is unavailable. Each sleeve still provides military-grade drop protection and prevents damage to device charging ports from constant docking with an integrated GDS® connector. The Next Generation IntelliSkin® for the Samsung Galaxy Tab Active3 includes a slot for the Samsung stylus and is compatible with a variety of GDS® Docks™ and accessories, as well as new docking cups for upgrading existing GDS® vehicle docks.

**Compatible Devices:**  
Samsung Galaxy Tab Active3
