Product name: ENDORFY Navis F360 ARGB
Product code: EY3B006

The ENDORFY Navis F360 ARGB is like an [ARGB-backlit](#) air conditioner for your PC – it keeps all the components pleasantly cool and glows like northern lights from outer space. Don't even try to count the compliments from your buddies, there will be too many.

The ENDORFY Navis F360 ARGB coolly meets the requirements of demanding CPUs – all thanks to a silent pump block with ceramic bearings and PWM controller. Together with three Fluctus 120 PWM ARGB fans and a radiator, it's a set that will make you forget about PC overheating. It's compatible with all popular sockets and fits perfectly into almost any CPU available on the market. Thanks to the simple mounting system and pre-installed fans, you can assemble it in no time at all.

~~Quite~~ Quiet powerful
The Navis F360 ARGB liquid cooler is so quiet that you can hear all sorts of unusual sounds while you ~~work~~ play. For example, the rustling of a curtain in the wind or the buzzing of a fly. In the other room. With the door closed.

This is thanks to the award-winning Fluctus 120 PWM fans – now equipped with ARGB – which provide a constant stream of airflow. Their blades have been designed to push as much air as possible through the densely arranged heatsink fins. We affectionately call them Huginn and Muninn because they work at the speed of Odin's ravens.

Each blade has a wavy edge to further reduce fan noise (psychoacoustic optimizations used in Fluctus fans are patent pending). Welcome to the ~~dark~~ silent side of the force.

At top speed
We live and breathe cooling systems, and we know that running on high settings = high hardware demands. That's why we've made sure that the Navis F360 ARGB keeps the CPU's temperature down, even when you're battling virtual enemies on the highest settings for several ~~hours~~ days on end.

This is made possible by the asymmetrical water block, which collects thermal energy from the processor. We combined it with a ceramic-bearing pump, the speed of which (from 1600 to 2600 rpm) can be controlled by a PWM signal. Simply speaking, the pump adjusts its speed of rotation to match that of the fans – and you can finally work in silence.

The liquid in the Navis F360 ARGB is cooled by a compact (360 mm) radiator. We designed it specifically for our greatest pride – the Fluctus fans. Such a combo will leave your besties speechless and jealous.

Can you [turn on](#) the light?
Hardware without ARGB is fine – but the truth is that it's fun to have northern lights all over the desk. That's why we gave you the Fluctus 120 PWM fans with ARGB. We also highlighted the edge of the pump block and the ENDORFY logo – enjoy!

With [ARGB](#), you can change the look of the fans with just a click or two. The Navis F360 ARGB works just as well as its non-ARGB brother. They have the same design because we don't compromise on performance for a cool look.

Have fun!
The Navis F360 ARGB lights up even when you don't have a compatible motherboard or a PC case equipped with a dedicated controller. This magic is possible thanks to the Nano-Reset ARGB controller we've added to the cooler. Just set one of the pre-programmed lighting effects and have fun!

40 cm of efficiency
If you spend half your life in front of a computer, you know that bigger radiators are more efficient. That is why the Navis F360 ARGB is almost [40 cm](#) long – a size that will keep even the biggest PC cases cool.

Its assembly is a piece of cake. Thanks to the flexible tubing, you can easily mount the cooler inside your computer. Each of them is about 42 cm long – making the assembly infinitely easier.

Not so creepy pasta
Together with the Navis F360 ARGB, you'll get efficient and easy-to-apply Pactum PT-3 thermal ~~pasta~~ paste, which is enough for several installations. You have nothing to fear – we have tested it ourselves.

ENDORFY Navis F360 ARGB – main features:
- All-in-one water cooling
- PWM-controlled pump
- Three Fluctus 120 PWM ARGB fans
- Extended fan speed range
- Bright ARGB LED illumination
- Nano-reset ARGB controller
- Kink-resistant rubber tubing
- Multi-socket compatibility with the newest AMD and Intel CPUs

ENDORFY Navis F360 ARGB – technical specifications:
- Product code: EY3B006
- EAN: 5903018665931
- Product type: CPU liquid cooler
- Radiator specifications:
    - Radiator dimensions: 120×395×28 mm
    - Radiator dimensions (incl. fans): 120×395×54 mm
    - Material: aluminum
- Fan specifications:
    - Fan quantity: 3
    - Type of fans: Fluctus 120 PWM ARGB
    - Fan dimensions: 120×120×25 mm
    - Fan bearings: FDB
    - Fan speed: 250 (±100) – 1800 (±10%) RPM
    - Control (speed): PWM
    - Connector (fan): 4-pin (power, male and female)
    - Voltage (fan): 12 V

- o Current (fan, peak): 0.30 A
- o Control (LED): ARGB
- o Connector (LED): 3-pin (male and female)
- o Voltage (LED): 5 V
- o Current (LED, peak): 0.30 A
- o MTBF: 100 000 h
- Pump specifications:
  - o Base: copper
  - o Bearing: caramic
  - o Speed (pump): 1600 – 2600 (±10%) RPM
  - o Control (speed): PWM
  - o Connector (speed): 4-pin PWM (female)
  - o Voltage (pump): 12 V
  - o Current (pump, peak): 0.33 A
  - o Control (LED): ARGB
  - o Connector (LED): 3-pin (female)
  - o Voltage (LED): 5 V
  - o Current (LED, peak): 0.18 A
  - o Connector (power): SATA
- CPU compatibility:
  - o AMD: AM4, AM5
  - o Intel: LGA1700, LGA1200, LGA1150, LGA1151, LGA1155, LGA1156, LGA2066, LGA2011-3, LGA2011 (square ILM)
- Warranty: 36 months

ENDORFY Navis F360 ARGB – logistics data:
- Retail box dimensions: 480×165×155 mm
- Weight (net): 1.430 kg
- Weight (gross): 1.930 kg
- Master carton dimensions: 510×495×335 mm
- Master carton weight (gross): 12.80 kg
- Product quantity in master carton: 6 pcs

Set includes:
- Navis F360 ARGB cooling solution
- 3× Fluctus 120 PWM ARGB fan
- Nano-reset ARGB controller
- Mounting accessories
- Pactum PT-3 thermal compound
- Safety instruction
