

USB-A to USB-C Data blocker cable 1,5m

MPN: MC-AUSBC-SC

Safe Charge, is a new line of charging cables and adapters developed in cooperation with **The Danish Armed Forces**, ensuring the highest level of security. The cables & adapters block any kind of data coming from a source.

This means that your personal information is always kept secure.

By removing the data wires & adding a chip that emulates a data signal, you can make sure the product only charges and does not get any “not compatible” issues.

All-in-all great product for preventing yourself from Juice hacking.

- Charging is 5V at 2,4A, 12W max.
- Nylon Braiding
- Aluminum housing
- Double Shielded
- 100% recycled packaging

Safe Charge – developed in cooperation with The Danish Armed Forces

Introducing Safe Charge, our new line of safe charging cables and adapters developed in cooperation with The Danish Armed Forces, ensuring the highest level of security. We have designed this series with your safety in mind, so you can charge your devices without worrying about juice jacking or data breaches.

Our Safe Charge series is designed in high quality and a simple and elegant design marked with a red colour, signalling that these products can't transfer any data – only charge your devices. This means that your personal information is always kept secure. Our Safe Charge lightning cables are also MFI certified, so you can charge your Apple devices with confidence.

Don't take any chances when it comes to your device's security and privacy. Choose Safe Charge, and charge with care.
