

# Delock Industrial Barcode Scanner 1D and 2D for 2.4 GHz or Bluetooth with inductive charging station

# Description

This barcode scanner by Delock can be wirelessly connected to a PC, laptop or directly to a mobile phone or tablet. **All common 1D and 2D barcode types** can be precisely captured even at long distances. Additionally, the scanner recognizes barcodes displayed on displays and monitors.

### Automatic adaptation to ambient brightness

The scanner automatically adapts to the ambient brightness and captures **up to 120 scans per second** under optimal lighting conditions.

In low ambient brightness, the barcode is illuminated by an additional white LED and can therefore also be used in poor lighting conditions.

### Sturdy processing

Due to its sturdy design, the scanner can easily absorb falls of up to 1.80 m and is therefore ideally suited for use in industrial environments.

## Charging station acts as interface

The data transfer of the scanned barcodes is done either via Bluetooth or via the 2.4 GHz frequency band. In addition to charging the hand scanner, the scanner's inductive charging station also functions as both a Bluetooth and a 2.4 GHz interface and is connected to the system via a USB cable.
