Panel PC P21WL01-i3

Intel Core-i3 ULV

INDUSTRY-GRADE PANEL PC WITH 21.5" DISPLAY

The high-value P21WL01 series of Panel PCs comes with a rugged Aluminium chassis with a IP65 compliant front panel and is powered by an Intel ULV processor. The display is Full-HD and sports a projected capacitive 10-point multi-touch function. With its passive cooling the system is virtually noiseless, maintenance-free and approved for 24/7 nonstop operation. The Panel PC is available with different Intel Core processors and additional features on request. This makes it the perfect choice for rugged and public applications such as healthcare, hospitality sector, digital signage, P0I, P0S, Kiosk and industry.

SPECIAL FEATURES

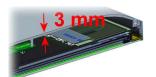

Reliable nonstop operation
The Shuttle Panel PC P21WL01-i3 is officially approved for 24/7 permanent operation at an ambient temperature of up to 40 °C. Thanks to its low power consumption and completely passive cooling, this PC runs highly reliably and is virtually noiseless.

21.5" Full-HD Touch Screen
This Panel PC has a high-grade 21.5"
(54.6 cm) Full-HD display with high
brightness (300 cd/qm) and low
viewing angle dependence (±89°). The
capacitive multitouch screen can
also be operated with gloves and allows precise input with two or more
fingers at the same time.

Robust Aluminium Chassis
Rear chassis and middle frame are
completely made of high-grade Aluminium of 3 mm thickness.

Protection Class IP65

The front panel is dust-protected and protected from splashing of water according to IP protection class 65. Consequently, this All-in-One PC can be used for those indoor applications, where the touchscreen may be exposed to humidity and splashing of water. This is particularly welcome in restaurants, laboratories, production or other places.

VESA Mounting

The Shuttle Panel PC P21WL01-i3 has four threaded holes for mounting a 100 x 100 mm VESA mount, which is not included. For example, a suitable stand, VESA arm or wall mount can be used to mount the Panel PC.

Note: VESA mount and stand are not included in the scope of delivery.

Optimized cable management The connections on the back panel are facing down and hidden by a

cover. The cover snaps in magnetically and is also fixed with screws.

Through a small opening the cables are led away from the PC in an order

Through a small opening the cables are led away from the PC in an orderly fashion This leads to an effective cable management making for a clean, tidy appearance.

Hidden Power Button

Since the power button is not accessible when the cover is on, there is also a Rock Switch hidden on the back. You can also enable the "Restore on AC Power Loss" option in the BIOS so that it always starts immediately once voltage is applied.

External 2.5" Bay

A 2.5" drive bay for an SSD drive is accessible from the outside for easy swapping of storage for installation and upgrade convenience. Additionally, an SSD card in M.2-2280/2260 format can be installed inside.

Triple Display Support

In addition to the built-in display two more independent Full-HD displays can be connected via HDMI 1.4b and DVI-I. The DVI-I port also provides the output signal for analog VGA displays.

Triple COM Port

The numerous connections include three serial COM ports with D-Sub connectors, two of which also support the RS422/485 standard.

Dual Intel Gigabit Netzwerk

The Shuttle Panel PC P21WL01-i3 supports Dual Gigabit LAN with Intel network adapters, which are known for their excellent performance and driver compatibility and therefore are the preferred choice in professional environments.

Potential equalization (opt.)

A 6.5 mm perforation allows the installation of an optional potential equalization pin (POAG) according to DIN 42801 in order to connect the Panel PC with a suitable potential equalization terminal, that can be required in medical environments, for example.

Modification on request

Upon request on a project-related basis, the Shuttle Panel PC P21WL01-i3 can be ordered with external WLAN antennas or other connections (e.g. DisplayPort, additional USB ports or a second HDMI port).
