

MOBOTIX HUB L2

Starter level for smaller businesses with one location

MOBOTIX HUB L2 is the starter level for smaller businesses with one location. L2 manages up to 48 surveillance cameras and supports easy integration of video into existing business operations. It is suitable for applications like retail stores, parking lots or office buildings with moderate security requirements.

Reliable

When you don't have resources available to look at the video 24/7 but still need to be notified if anything requires your attention, MOBOTIX HUB L2 is your answer.

Customizable

With MOBOTIX HUB L2 you can customize your VMS and use it for more than just security to maximize your investment.

Scalable

When you need a system that's expandable to meet future requirements to protect the initial investment, MOBOTIX HUB L2 gives you the scalability you're looking for.

User-friendly

When you only use the system occasionally and can't spend time figuring out how it works, MOBOTIX HUB L2 is designed with simplicity in mind, so you can quickly do your tasks and move on.

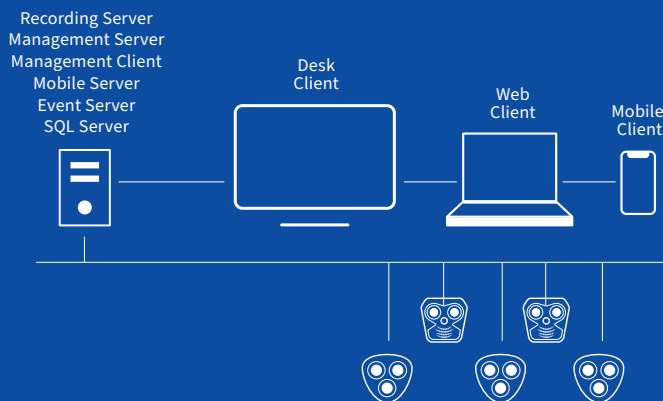

Secure

When you want to reduce the security risk of your system and protect it against internal and external security threats in the most optimal way, you can rest assured that MOBOTIX HUB L2 gives you the protection you need.

System Diagram – Simple system, all in one

Simplest possible design where everything is connected to the same network and all server components and MOBOTIX HUB clients run on the same server/PC.

HIGHLIGHTED FEATURES

Push Notifications

With support for push notifications, you can sleep soundly knowing the system will automatically notify you if anything requires your action.

MOBOTIX HUB Clients

Whether you are on-the-go, off-site or onsite, your installation is only a click away with support for all three MOBOTIX HUB clients.

Recording rate min. 3.1 Gbit/s

Running on the best-performing recording engine in the market, you get a reliable system you can always count on.

Third-Party Integration

MOBOTIX HUB is compatible with numerous applications and devices from partners and third-party providers via interfaces. This wide range of system extensions (plug-ins) allows you to adapt MOBOTIX HUB even more accurately to meet your requirements and fit your existing system infrastructure.

MOBOTIX HUB Add-Ons

Add extra value and functionality to your video installation with any of the MOBOTIX HUB Add-on products that work out of the box with MOBOTIX HUB.

Encryption

Certificate-based encryption to secure the communication of data (video, audio, metadata) originates in the recording server and is retrieved by connected components.

Per-Device Licensing Model

A simple per-device licensing model lets you choose the number of device licenses you need today while giving you the freedom to easily expand with more devices in the future.

Easy Upgrade

If you want to expand to multiple locations or extended capabilities, a simple license exchange will upgrade your current system to one of the more advanced MOBOTIX HUB variants.

MOBOTIX Interconnect

If you have many smaller installations spread across geographically detached sites but need central operations, you can link them with MOBOTIX HUB L5.

Multi-Layer Maps

Although simple and intuitive to use, multi-layer maps and alarm management give you a complete overview of your installation so you are always on top of things.

Adjustable User Interface

An adjustable user interface allows you to optimize the user experience to match your and other users' roles and responsibilities.

Centralized Search

Save time and effort with advanced search tools that help you easily find what you're looking for in no time.

Rule Engine

A built-in Rule Engine makes it possible to automate a wide range of security functions, increasing operational efficiency.

User Access

If multiple users need to access the system, you can effectively control each user's access permissions on the viewing client level.

Dual Authentication

Offer an additional level of security by granting the user access to the viewing interface only when a second user has confirmed the login with dual authentication.

Password Protection

To ensure that evidence doesn't end up in the wrong hands, you can password protect video files and limit access to authorized users.

HTTPS

Supports HTTPS communication between the recording server and the connected cameras and other security devices.

Metadata

Do more with your system with support for metadata.
