Made for iPhones and iPads

The ADATA USB-C to Lighting Cable is MFi-certified, which means it is designed to work with iPhones, iPods, and iPads. What's more, its USB-C specification ensures compatibility with USB-C devices for charging and data transmissions.

High-Quality Materials

The cable sports wide 24 AWG gauge tinned copper wires with a multi-layered protective casing to reduce electromagnetic interference as well as data and power loss. The outer sleeve is made from highly elastic TPE to withstand cracking and deformation for a long-lasting product.
