

Cisco Industrial Ethernet 5000 Series Switch

Developed specifically to withstand the harshest industrial environments, these switches offer the most flexible and scalable Industrial Ethernet platform that grows with your network.

Product Overview

The Cisco® Industrial Ethernet (IE) 5000 Series Switches with four 10 Gigabit or four 1 Gigabit Ethernet uplinks and 24 Gigabit Ethernet downlinks is a rack mount, ruggedized switch that provides Layer 2 and Layer 3 line rate aggregation and copper Power over Ethernet (PoE) connectivity in the harshest of industrial environments.

The IE 5000 Series uses superior high-bandwidth hardware switching and proven Cisco IOS® Software. The IE 5000 is highly secure and scalable for access and aggregation layer deployments. It also provides Cisco stackable technologies for advanced network reliability. The switch is built to withstand extreme environments while adhering to overall IT network design, compliance, and performance requirements.

The IE 5000 Series is ideal for Industrial Ethernet applications where hardened products are required. This includes utility industries, manufacturing, energy and process control, intelligent transportation systems (ITS), oil and gas field sites, city surveillance programs, and mining. With improved overall performance, greater bandwidth with available 10 Gigabit Ethernet interfaces, a richer feature set, and enhanced hardware, the Cisco IE 5000 Series Switches complement the current Industrial Ethernet portfolio of products. This portfolio includes Cisco industrial Ethernet switches, such as the Cisco IE 2000, IE 3000, IE 3010, IE 4000, and IE 4010 Series Switches, as well as utility- focused products, such as the Cisco IE 2000U Industrial Ethernet switches and Cisco 2500 Series Connected Grid Switches.

Through a user-friendly web device manager, the IE 5000 provides easy out-of-the-box configuration and simplified operational manageability to deliver advanced security, data, video, and voice services over industrial networks.

Features and Benefits

Table 1. Features and Benefits of Cisco IE 5000

Feature	Benefit
Robust Industrial Design	<ul style="list-style-type: none"> • Built for harsh environment and temperature range (-40° to 75°C). • Every IE-5000-12S12P-10G is conformal coated. • Hardened for vibration, shock, surge, and electrical noise immunity. • Four 10 Gigabit or four 1 Gigabit Ethernet uplink ports provide multiple resilient design options. • Complies with multi-industry specifications for industrial automation, ITS, and electrical substation environments. • Improves uptime, performance, and safety of industrial systems and equipment. • Compact 1 rack unit design with dual LED feature allowing easy monitoring and troubleshooting even when reverse mounting based on cabling requirements. • Fanless, convection cooled with no moving parts for extended durability. • IEEE 1588v2 PTP (both power profile and default profile are supported). • Alarm I/O for monitoring and signaling to external equipment. • Built-in GNSS/GPS receiver, a source of Grand Master Clock (GMC) for time distribution including PTP or IRIG-B.

Feature	Benefit
User-Friendly GUI Device Manager	<ul style="list-style-type: none"> • Allows easy configuration and monitoring with a web based Device Manager. • Eliminates the need for more complex terminal emulation programs. • Reduces the cost of deployment.
SwapDrive: “Zero-Config” Replacement	<ul style="list-style-type: none"> • True zero-configuration replacement for easy middle-of-the-night or middle-of-nowhere failure recovery. • Simple switch replacement in case of a failure. • No networking expertise required. • Helps ensure fast recovery.
High-Density Industrial Power over Ethernet (PoE)	<ul style="list-style-type: none"> • Support for up to 12 PoE or PoE+ ports. • Controls costs by limiting wiring, distribution panels, and circuit breakers. • Reduces equipment needs, thus requiring less space and reducing heat dissipation. • Enables ready-to-use PoE devices, such as IP phones, cameras, and wireless access points. • Supports maximum high-definition (HD) camera deployments. • Power budget of 65W for PoE or PoE+ with one power supply and up to 185W with two power supplies.
High-performance Ethernet Switch with 4x10 GE or 4x1GE uplinks and 24x1 GE downlinks	<ul style="list-style-type: none"> • Connects new wireless access point (802.11n and 802.11ac). • Enables new HD IP cameras. • Provide high-speed, low-latency connectivity for PLCs, controllers and associated I/O devices. • Allows Supervisory Control And Data Acquisition (SCADA) connectivity. • Provides introduction of new bandwidth-hungry applications in the industrial space. • Line-rate, low-latency forwarding with advanced hardware assisted features (such as NAT, IEEE1588v2). • Supports very-delay-sensitive applications and time-sensitive networks. • Delivers multiple rings and redundant ring topology for new network configurations. • Extends geographical scalability where longer distance connectivity is required.

Your Ruggedized Choice for Industrial Environments

The Cisco Industrial Ethernet 5000 Series Switches offer:

- Bandwidth and capacity to grow with your networking needs: High performance nonblocking switch capacity with up to 24 Gigabit Ethernet downlink ports and four 10 Gigabit or four 1 Gigabit Ethernet uplink ports per switch.
- SFP+ heater to allow standard SFP+ optics to operate to -40C (10GE SKU only).
- Cisco IOS Software features for smooth IT integration and policy consistency.
- Robust resiliency enabled by features, such as dual-ring design through four 10 Gigabit Ethernet uplink ports, REP, PRP, Etherchannel, Flexlink, redundant power input, and dying gasp.
- Oven-controlled crystal oscillator (OCXO) to provide superior frequency stability needed for precise synchronization applications.
- Simplified software upgrade path with universal images.
- Integrated hardware support for features such as TSN, and HSR that can be enabled with future software changes to add value and longevity to the IE 5000 platform.

Figure 1 shows the IE 5000 switch, Table 2 and 3 shows the available IE 5000 switch-ordering PID, and Table 4 lists the power supplies for Cisco Industrial Ethernet 5000 Series Switches.

Figure 1. IE 5000 Switch

Table 2. Cisco Industrial Ethernet 5000 Series Switches Models

Product Number	Total Ports	Uplinks	SFP Fiber Ports (S)	Copper 10/100/1000 PoE/PoE+ Ports	Default Software
IE-5000-12S12P-10G	28	4 SFP/SFP+ (1G/10G) ¹	12 (FE/GE)	12 (10/100/1000M)	LAN Base ²
IE-5000-16S12P	28	4 SFP (1G)	12 (FE/GE)	12 (10/100/1000M)	LAN Base ²

¹ Uplink ports can run at 1 Gigabit Ethernet or 10 Gigabit Ethernet mode depending on the SFP or SFP+ inserted.

² Can be upgraded to IP Services license with the PID in table 3.

Table 3. Cisco IE 5000 Software Licenses

License	Description
IE-LICENSE-SPARE	Spare license for software upgrade (L2 to L3 or MRP ring)
L-IE5000-RTU=	IE5000 Electronic software license upgrade from LAN base to IP Service L3 features
LIC-MRP-Manager=	MRP ring manager license
LIC-MRP-Client=	MRP ring client license

Table 4. Power Supplies for Cisco IE 5000 Series Switches^{1,2}

Product Number	Wattage	Rated Nominal Input Operating Range	Supported Input Voltage Operating Range	PoE/PoE+ Support	Use Case Scenario
PWR-RGD-AC-DC-H	150W	AC 100-240V/2.0A 50- 60Hz or DC 100-250V/2.0A	AC 85-264V or DC 88-300V	Yes	High Voltage AC or DC Power Source, for hazardous locations ^{1,2}
PWR-RGD-LOW-DC-H	150W	DC 24-60V/10A	DC 18-75V	Yes	Low Voltage DC Power Source, for hazardous locations ^{1,2}

¹ With 1 PS there is 65W available for PoE/PoE+; with 2 PS there is 185W available.

² A single power supply from the above list is required when ordering. A second power supply of any voltage type is supported and will provide redundancy as well as additional power for POE devices.

Product Specifications

Table 5 lists physical specifications, Table 6 gives information about switch performance and scalability, Tables 7 and 8 list some important software features, Table 9 lists compliance specifications, and Table 10 gives information about management and standards of the Cisco IE 5000 Series Switches, and Table 11 are list of supported SFPs.

Table 5. Physical Product Specifications

Description	Specification
Hardware	<ul style="list-style-type: none"> • 1-GB DRAM • 256-MB onboard flash memory • 1-GB removable SD flash memory card • Mini-USB connector • RJ-45 traditional console connector • GNSS/GPS antenna interface - GPS antenna input • Analog Timing I/O interface- For analog IRIG support • Digital Timing I/O interface - For digital timing such as IRIG-B TTL • TOD interface(needs future software support) - Cisco Time-of-Day port to provide RS422 1 PPS, IRIG-B TTL or IOS-8601 and NMEA Time-of-Day support
Alarm	<ul style="list-style-type: none"> • Alarm I/O: four alarm inputs to detect dry contact open or closed, one Form C alarm output relay
Dimensions, (H x W x D)	<ul style="list-style-type: none"> • 1.75 x 17.5 x 14.0 in. (4.45 x 44.5 x 35.6 cm), 1RU (rack unit) height
Weight	<ul style="list-style-type: none"> • Without Power Supply: 13.7 lbs (6.21 kg) • PWR-RGD-AC-DC-H: 2.55 lbs (1.16kg) • PWR-RGD-LOW-DC-H: 2.5 lbs (1.13kg)
Power Consumption	<ul style="list-style-type: none"> • Maximum of 90W not including PoE consumption
Accessories	<ul style="list-style-type: none"> • SD-IE-1GB= - Spare SD card

Table 6. Switch Performance and Scalability

Description	Specification
Forwarding Bandwidth	28Gbps (IE-5000-16S12P) or 64Gbps (IE-5000-12S12P-10G) - Line rate/Non-blocking
Switching Bandwidth	56Gbps (IE-5000-16S12P) or 128Gbps (IE-5000-12S12P-10G)
Forwarding Rate	41.67Mpps (IE-5000-16S12P) or 95.238Mpps (IE-5000-12S12P-10G) with 64 byte packets (Line rate)
Number of queues	4 egress
Unicast MAC addresses	16,000
IGMP multicast groups	1,000
Number of VLANs	1,005
IPv4 MAC security ACEs	1,000 with default TCAM Template
NAT translation	Bidirectional, 256 unique subnet NAT translation entries, which can expand to tens of thousands of translated entries if designed properly

Table 7. Cisco IE 5000 Key LAN Base Software Features

LAN Base License (Default)	Features
Layer 2 Switching	IEEE 802.1, 802.3, 802.3at, 802.3af standard, VTPv2, NTP, UDLD, CDP, LLDP, Unicast Mac filter, Flexlink, Resilient Ethernet Protocol (REP), Parallel Redundancy Protocol (PRP), VTPv3, EtherChannel, Voice VLAN, QinQ tunneling
Security	SCP, SSH, SNMPv3, TACACS+, RADIUS Server/Client, MAC Address Notification, BPDU Guard, Port-Security, Private VLAN, DHCP Snooping, Dynamic ARP Inspection, IP Source Guard, 802.1x, Guest VLAN, MAC Authentication Bypass, 802.1x Multi-Domain Authentication, Storm Control
Layer 2 Multicast	IGMPv1, v2, v3 Snooping, IGMP filtering, IGMP Querier
Management	Fast Boot, Express Setup, Web Device Manager, Cisco Network Assistant, Cisco Prime™ Infrastructure, MIB, SmartPort, SNMP, syslog, Storm Control - Unicast, Multicast, Broadcast, SPAN Sessions, RSPAN, DHCP Server, Customized TCAM/SDM size configuration, DOM (digital optical management), Hardware Watchdog, Netflow-lite
Industrial Ethernet	CIP Ethernet/IP, PROFINET v2, IEEE1588 PTP v2 Modbus TCP, Default Profile, CIP Time Sync, NTP to PTP Translation
Quality of Service	Ingress Policing, Rate-Limit, Egress Queuing/shaping, AutoQoS, QoS
Layer 2 IPv6	IPv6 Host support, HTTP over IPv6, SNMP over IPv6
Layer 3 Routing	IPv4 Static Routing

LAN Base License (Default)	Features
Industrial Management	Layer 2 switching with 1:1 static Network Address Translation (NAT)
Utility	IEEE 1588 v2 PTP Power Profile, dying gasp, GOOSE messaging, SCADA protocol classification, MODBUS TCP/IP, utility SmartPort macro, BFD, Ethernet OAM, IEEE 802.3ah, CFM (IEEE 802.1ag)
Redundancy	Horizontal Stacking supports Layer 2 switching, ARP, Spanning Tree, port channel, REP ring, Power over Ethernet, static routing, L3 host routing (via two 10GE uplink stack ports)
Timing Interface	IRIG-B Input/Output interface (B002, B003, B006, B007, B122, B123, B126, B127 timecode) GNSS/GPS receiver as Grand Master Clock

Table 8. Cisco IE 5000 Key IP Services Software Features

IP Services Base License	Additional Features
Industrial Management	Embedded Event Manager (EEM)
IP Unicast Routing Protocols	OSPF, EIGRP, BGPv4, IS-IS, RIPv2, Policy-Based Routing (PBR), HSRP
IP Multicast	PIM sparse mode (PIM-SM), PIM dense mode (PIM-DM), and PIM sparse-dense mode
Cisco Express Forwarding	Hardware routing architecture delivers extremely high-performance IP routing
IPv6 Routing	RIPng, OSPFv6, and EIGRPv6 support
Virtualization	VRF-lite
Security	IEEE 802.1AE MacSec (15.2(5)EA supports both uplink and downlink), Cisco TrustSec® supports inline tagging SGT and SGACL

Cisco and Partner Services

At Cisco, we're committed to minimizing our customers' TCO, and we offer a wide range of services programs to accelerate customer success. Our innovative programs are delivered through a unique combination of people, processes, tools, and partners, resulting in high levels of customer satisfaction. Cisco Services helps you protect your network investment, optimize network operations, and prepare your network for new applications to extend network intelligence and the power of your business. Some of the key benefits our customers can get from Cisco Services follow:

- Mitigating risks by enabling proactive or expedited problem resolution

- Lowering TCO by taking advantage of Cisco expertise and knowledge
- Minimizing network downtime
- Supplementing your existing support staff so they can focus on additional productive activities

For more information about Cisco Services, refer to Cisco Technical Support Services or Cisco Advanced Services at <https://www.cisco.com/web/services/>
